

## Vitemint Peppermint oil

### Hygiene & uddercare

Vitemint is a unique product containing 36% Japanese peppermint oil and vitamin E. Both help to achieve a good condition of the udder. The cream is easy to apply and is quickly and completely absorbed by the skin.

#### Usage

Vitemint offers an ideal solution in all cases in which the blood circulation must be locally stimulated, as in the instance of mastitis and oedema. Vitemint also is an efficient support for the mastitis treatment by a veterinarian.

#### ViteMint advantages:

- No antibiotics
- The cream is absorbed quickly and completely by the skin.
- It provides treatment possibilities of hard udders, without loss of milk.
- Stimulates the blood circulation and improves the udder condition.
- Vitemint contains Vitamin E for skin care.
- Available in 500 ml hanging bottle, 1 and 2,5 L bottle
